

checkBin - Technology

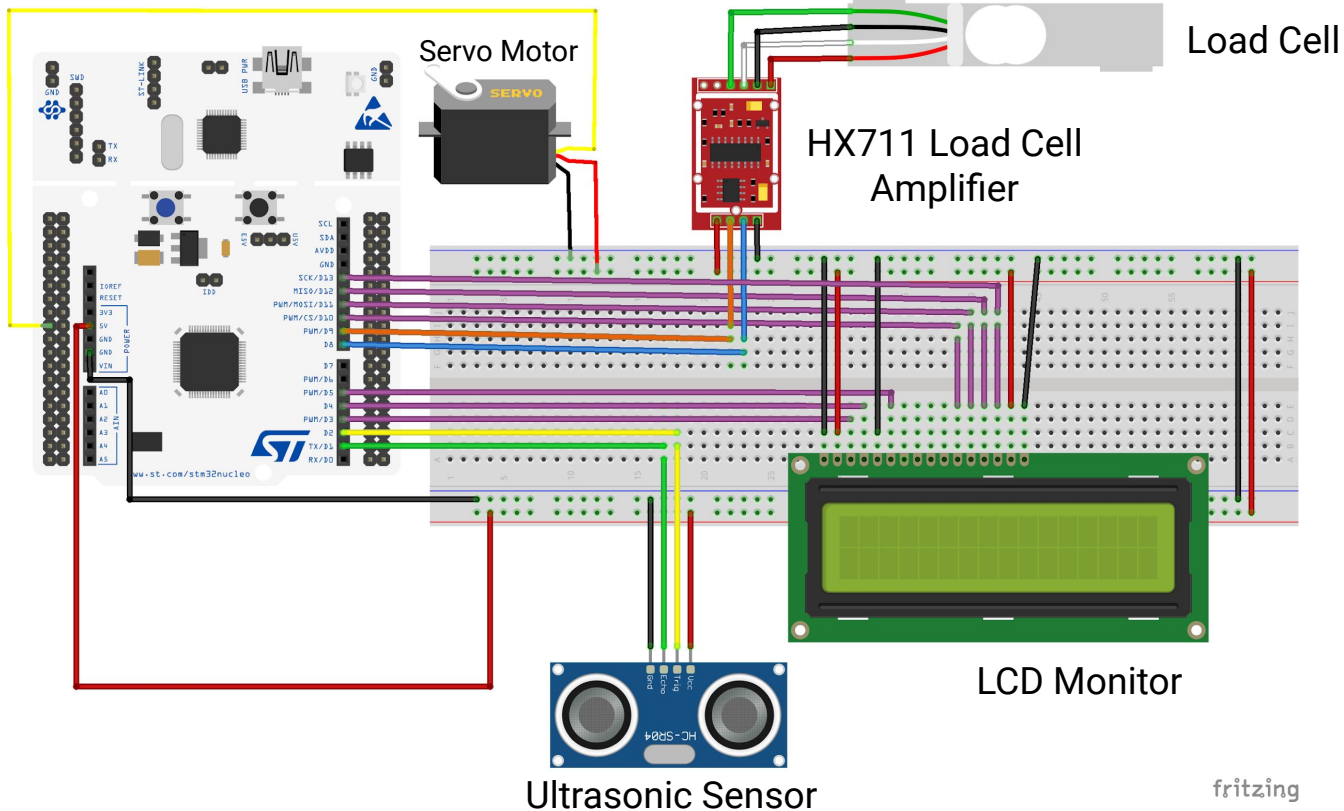

General Architecture

Bin - Overview

Bin - Circuit Detail

Components Details - STM LoRa Board

used to provide local computation
and communications

Components Details - Servo Motor

used to lock the bin once it is full

Components Details - LCD Screen

used to show the bin's status

Components Details - Ultrasonic Sensor

used to measure the fill level
of the bin

Components Details - Load Cell and HX711

used to weight the trash
inside the bin

Energy constraints

- Low consumption
- Charge few times as possible
- Tailor duty cycle on the needs
